Getting Started

Congratulations on your investment in the most remarkable high output photonic-botanical systems ever developed! Welcome to our family of highly satisfied users and clinicians of all disciplines who are experiencing consistently excellent patient/client satisfaction and optimal clinical results from the application of our highly advanced technology. All of us at HALO Systems, Inc. know what an exciting time this is for you and it is our foremost desire to assist you in all ways to obtain the most favorable outcomes, personally or with your patients/clients. Satisfaction from using your Photon-botanical Harmonics System and related botanical topical and internal support products is our highest priority. We are confident that HALO Systems is redefining the standard of care involving high output harmonic light systems.

This manual addresses the functionality of both the HALO MAX and HALO Ultra Blue systems. The mechanics of biophotonic therapy is the same for both systems. Should you encounter a comment that provides instructions for either one of the light devices, the concept is applicable to both. This user manual focuses on the description of the botanically filled vials/tubes, HALO systems, product details and basic instructions in application.

Because there is no “one size fits all” instruction to meet the multiverse of physical, emotional and neurological conditions a human body can be afflicted with, this manual provides you with a basic starting point for personal application. You are encouraged to begin using the product according to the instructions and then find your own personal routine and rhythm that fits your individual needs.

Blessings and Light,

Michael Thomas

Light Device Cautions & Possible Hazards

HALO Systems light devices incorporate high output VIOLET LED diodes. These light diodes are highly reactive to finger oils and other contaminants and are never to be touched or handled in any way by other than professional, HALO certified repair technicians. The HALO Systems light device is designed to run continuously up to one hour, but HALO sessions generally do not require more than one or two minutes per vial. Switch the light off between vial changes to save battery power and provide longevity to the LED diodes.

HALO Systems light devices are built to military specifications and manufactured by highly skilled technicians using the world’s most advanced and durable light output sources, optics, relays, switches, electronics, circuitry, light housing units and glass botanical vial systems available. It is for these reasons you can be assured that every HALO Systems device is of premium quality and why we can offer a one year warranty on your premium investment (please see Warranty Certificate located at the end of this manual).

The botanical vial/tube systems combine numerous botanical substances including exotic rain forest botanical extracts, herbs, amino acid complexes and other naturally based proprietary formulations to be used in a multitude of physio-harmonic protocols designed to assist you or your patient/client attain faster and more effective relief and long-term recovery.

**CAUTION:** HIGH OUTPUT VIOLET LED LIGHT IS NOT AS HAZARDOUS AS LASER LIGHT, HOWEVER, THE FOLLOWING PRECAUTIONS SHOULD BE CAREFULLY ADHERED TO: NEVER ALLOW A CHILD OR MENTALLY CHALLENGED ADULT TO HANDLE ANY FORM OF THERAPEUTIC LIGHT DEVICE. THESE PRECAUTIONS ARE ALSO VERY IMPORTANT FOR HOME UNITS OR IF THE CLINICIAN BRINGS THE LIGHT DEVICE HOME WHERE CHILDREN COULD HAVE ACCESS AND ACCIDENTALLY INJURE THEMSELVES OR OTHERS. THE DEVICE SHOULD ALWAYS BE CONSIDERED A POTENTIAL HAZARD IF USED INAPPROPRIATELY.

DO NOT TOUCH THE LIGHT DEVICE DIRECTLY TO THE BODY OR SKIN. THIS IS NOT NECESSARY TO PROPER APPLICATION PROTOCOLS AND COULD RESULT IN MINOR BURNING FROM DIRECT CONTACT. HOLD THE LIGHT DEVICE, WITH VIAL INSERTED, AT LEAST ONE INCH FROM ANY SKIN SURFACE.

DO NOT SHINE THE LIGHT DIRECTLY INTO OPEN EYES. HALO APPLICATION MAY BE PERFORMED OVER THE EYE AREA WITH EYELIDS SHUT. USE COMMON SENSE WHEN OPERATING YOUR HALO ULTRA BLUE OR MAX LIGHT DEVICE.

WEAR POLARIZED SUNGLASSES TO PROTECT AGAINST TEMPORARY FLASH BLINDNESS OR LIGHT INDUCED HEADACHE WHEN USING THE LIGHT DEVICE(S).

DO NOT SUBJECT THE LIGHT SYSTEM OR BOTANICAL VIALS TO EXTREMES IN EITHER HEAT OR COLD. EITHER EXTREME COULD RESULT IN DAMAGE OR DESTRUCTION OF THE GLASS VIALS, ESPECIALLY FREEZING CONDITIONS. SUBJECTING THE LIGHT DEVICES AND/OR BOTANICAL VIALS TO EITHER OF THESE CONDITIONS WILL VOID YOUR WARRANTY AND YOU WILL BE LIABLE TO REPLACE DAMAGED ITEMS AT YOUR EXPENSE.

EVEN A VERY BRIEF DIRECT LIGHT EXPOSURE TO THE EYES CAN CAUSE TEMPORARY FLASH BLINDNESS. Never shine a light device directly into your own or another person's face or eyes, or in a direction where another person might be or could suddenly appear (This precaution also applies for pets and other animals).

REFLECTED LIGHT CAN ALSO BE A HAZARD. Prevent exposure from reflections off shiny surfaces, and "back reflections" from mirrors, glass and window surfaces. The focused intense light, or its direct reflection, may cause temporary flash blindness. Because of the hazards mentioned it is vital that you operate your light system in a safe and responsible manner. HALO Systems, Inc. requires that you acknowledge the following statements:
MISUSE CAN BE HAZARDOUS. Monitor ALL light device operations at all times. Keep away from children, mentally or physically challenged persons, or persons who do not understand light device hazards. Remember, therapeutic light sources are not toys and must be respectfully managed with appropriate caution and professional responsibility.

MISUSE CAN BE ILLEGAL - Obey all applicable laws. Do not aim a therapeutic light source beam toward law enforcement officers, ambulance or emergency responders or their vehicles. NEVER use to annoy, harass or distract other persons, birds or animals.

HALO Liquid-filled Vial Systems contain various proprietary botanical combinations that serve as the key to facilitating the body’s healing responses. These natural materials are sourced among numerous wild-harvested, renewable resourced ingredients.

**Cold weather/winter warning**

Should you leave your HALO light device or the Liquid-filled Vial Systems in your car or in any other way expose them to cold weather be sure to allow the light unit to return to normal room temperature (above 68 degrees Fahrenheit to a maximum of 80 degrees Fahrenheit) before operating. If the liquid-filled vials appear to be cloudy or frozen allow them to return to normal room temperature before using in the light unit. If they appear separated, frozen or cloudy after a few hours, take a blow dryer set to high heat and waft the dryer back and forth across the glass vial until you reach complete clarity.

**Application Definitions:**

**Sublingual Application:**
Sublingual (abbreviated SL), from the Latin for "under the tongue", refers to the route of application by which light/photon enters the body through tissues (blood vessels and meridians) under the tongue.

**Auricular Application:**
Auricular (ear) application is shining the light/photon into and around the ear, with emphasis on the ear canal and outer ear.

**Direct Application:**
Direct application is the direction of the light/photon to a particular body part only.

**Systemic Application:**
Systemic application is accomplished by shining the light/photon sublingually, on the auricle (ear) or by drinking structured and charged water.

**Water Structure:**
Direct the light/photon to the surface of the water to reformat the molecular structure into micro clusters for better hydration.

Not intended to treat disease, support or sustain human life, or to prevent impairment of human health.
HALO Botanical Vial/tube Systems

To provide clarification, a HALO System refers to a group of symptoms or afflictions that can be addressed by a botanically filled vial/tube or combination thereof. There are vials/tubes within the kit that are a combination of systems; therefore one single vial/tube may address multiple symptoms with a single application. For example: AE, A-V, DX, EZ, SS, L1, L2, L3 and EMN Combination vials (see page 23).

**Protocols**

The following protocols describe the many uses of the HALO system. Protocols are like “recipes,” which when followed, provide maximum results.

**Direct Protocol**

Certain therapies may require a direct approach. This is achieved by removing the clothes and shining the light through the appropriate botanical vial(s)/tube(s) directly onto the body. Light may be directed to any desired bodily area or simply at the main trunk for rapid absorption of harmonic energies. Choose the desired vial(s)/tube(s) and direct the light onto the desired area(s) for approximately 30 - 45 seconds. Observe results. Repeat if desired. Allow one to two hours between sessions to allow for absorption of the energies.

**Sublingual Protocol - Systemic**

Choose the desired vial(s)/tube(s) and shine the light directly on the tissue under the tongue on the floor of the mouth for 30 - 45 seconds. We have noticed remarkable results using this protocol as there are numerous energy meridians that transverse the sublingual area and speed the acceptance of harmonic energies into the body. Blood vessels are also readily accessible to transport the energies systemically.

The following are application protocols and the attendant results that can be achieved with the HALO ULTRA BLUE or HALO Max Harmonics Systems and botanical vial/tube systems:

**Pain Relief**

Pain relief can occur within seconds and last for days, weeks or months. Place the PAIN (A-V or P) vial or tube into your HALO light device, direct it toward the area(s) experiencing pain and press the power switch “ON” for approximately 30 - 45 seconds. Turn “OFF” and observe results. Repeat procedure if desired. Charge drinking water with PAIN harmonics and consume it or provide to your patient/client.

**Spine, Neck and Extremity Protocols**

A full range of spine, neck and extremity disorders respond very well to the HALO Systems photon therapy protocols. The entire spine, including neck regions, can often be effectively addressed within a total session time of 30 - 45 seconds. However, this time frame is only a starting point. Application times for extremity disorders will vary with severity and chronicity.
Abdominal Pain

In the event of food poisoning, gastric upset, gas pain or other gastro-intestinal related symptoms, insert the PAIN (A-V or P) vial/tube into the HALO light device and target the harmonic energies directly over the areas of distress until pain decreases or resolves. This should happen within 30 - 45 seconds. Address area as often as desired to mediate symptoms. If pain increases or does not resolve within a short period of time the condition may indicate the need for additional diagnostic evaluation and appropriate referral as necessary (Consider: myocardial infarction or other heart affliction, esophagitis or esophageal hernia, hiatal hernia, peptic or duodenal ulcer, cholecystitis/gallstones, bile obstruction, liver disease, pancreatitis, splenomegaly, colon obstruction, ovarian or uterine disorders, ectopic pregnancy, appendicitis, kidney stones, renal failure, etc.). Use professional judgment and careful clinical discernment in all decisions regarding patient/client care. The HALO Harmonic Systems are designed to complement rather than replace competent medical care.

Oral Cavity and Throat Conditions

In the application of painful tooth, gum, jaw, tongue and inner cheek, throat, tonsillar or lymph node disorders, pain reduction and expedited healing is often rapidly experienced using the PAIN (A-V or P) vial/tube. In the case of ulcerative conditions, open sores & lesions, use the HALO Systems device directly on the affected area for approximately 30 - 45 seconds. Switch to the SS vial/tube and continue direct application at intervals of 30 seconds until the condition has been noticeably diminished. Continue sessions until full recovery has been attained.

Canker, cold sores/fever blisters generally respond exceptionally well to HALO Systems PAIN vial/tube applications.

Painful Jaw Conditions, Unexplained Toothaches and Temporomandibular Joint (TMJ Disorders)

TMJ (TMD) conditions often respond very well with the PAIN (A-V or P) vial/tube. Shine light directly on affected area for 30 - 45 seconds. Consider Sublingual therapy as well for approximately 30 - 45 seconds.

Neuropathy – Direct and Sublingual

Liberally direct the light to the desired area of application and begin therapy with the PAIN (A-V or P) vial/tube for 30 - 45 seconds. Target the back of the neck, back, hips and upper legs. Open mouth and apply to sublingual area if desired. This has proven highly effective in reducing and eliminating the numbness & burning associated with certain neuropathies.

Neuralgia and Neuritis - Direct and Sublingual

Begin therapy with the PAIN (A-V or P) vial/tube for 30 - 45 seconds directed at the back of the neck, back, hips and upper legs or directly to desired areas. Open mouth and apply to sublingual area if desired.

In addition to addressing the painful body part(s) (i.e. feet/legs/arms/hands) we recommend that the photon therapy also be applied to the spinal segmental nerve root levels as well as all associated soft tissue trigger points that may be responsible for the radicular or referred pain.

Headache and Migraine Headache

Apply light therapy to the back and sides of the neck, forehead and temples. Beam the light energy over these areas using the PAIN (A-V or P) vial/tube for 30 - 45 seconds.

Tinnitus
Place the NEURAL (EMN) vial in the HALO light device and shine directly down the ear canal for 30 – 45 seconds. Repeat session as desired.

**Arthritis - All Forms**

Place the PAIN (A-V or P) vial/tube in the light device and shine light directly on affected areas for 30 - 45 seconds. Repeat if desired.

**Contusions, Bruises and Related Soft Tissue Damage**

Place the PAIN (A-V or P) vial/tube in the HALO light device and shine light directly on affected areas for 30 - 45 seconds. Repeat if desired.

For accelerated soft tissue recovery, also use the BODY System found in the A-V vial/tube following the application of light therapy on the damaged area(s) for 30 - 45 seconds.

**Carpal Tunnel Syndrome**

Place the PAIN (A-V or P) vial/tube in the HALO light device and shine light directly on affected areas for 30 - 45 seconds. Repeat if desired.

Space follow-up visits on alternate days. As healing continues, schedule subsequent session visits as deemed appropriate.

**Plantar Fasciitis – Heal Spurs**

Place the PAIN (A-V or P) vial/tube in the HALO light device and shine light directly on affected areas for 30 - 45 seconds. Repeat if desired.

**Fungus: Skin, Toenail & Fingernail**

Place the ORGANISM found in the A-V vial/tube in the HALO light device and shine light directly on affected areas for 30 - 45 seconds. Repeat if desired.
**Water Protocols**

It cannot be stressed enough how extremely important it is to begin HALO water therapy the moment you receive and start using your HALO System. Harmonic energies are transferred from cell to cell via electro-magnetic conductance. Just as in a car battery, energy cannot transfer, be present or stored, without the proper conducting medium. The body operates on the same principles. If you are using the HALO Systems on yourself or another and do not realize the effect(s) you feel you should, it is most likely due to your or their body running on “dead” or low conducting water. Energize the body with HALO harmonically charged water and you just might be amazed at the difference(s).

**Water/Liquid Charging**

Insert the WATER STRUCTURING (WS) vial into the HALO light device and shine the light into the water or liquid from the top of the container for 5 - 7 seconds, for every 16-20 ounces of fluid water. Remove the WS vial and insert any of the HALO vials/tubes into the HALO light device. The vial you choose will depend on the energies you desire to impart into the water or liquid. You may even combine vials and impart all HALO System harmonics into the water. As you drink the water or other liquid, the energies are absorbed and utilized by the body quite rapidly and noticeably. The effects utilizing this method are not as fast as a local application but are still quite effective. Results are usually noticed in 5–10 minutes and can last for hours, days or longer.

Do not shine the light through plastic containers. Fill the container and shine the light from the top into the water or liquid for about 5 - 7 seconds for every 16-20 oz. of water or liquid for each vial utilized. Then cap the container. This is a great way for your body to absorb even more photonic/botanical energies and further positively enhance your lifestyle.

**Water Structure**

All water charging is done with the HALO ULTRA BLUE High Output Violet light device as the violet wavelength carries more harmonic information than other wavelengths. Therefore, violet light charges water more quickly and thoroughly than utilizing any other light frequencies.

**Step 1:**
Start with the WS HALO vial and shine the light directly on the open water surface 5-7 seconds for every 16 to 20 fluid oz.

**Step 2:**
Repeat the procedure above with any number of vials of your choice. Water will retain the harmonic resonance of each of the vials you choose to structure your water with. There is no limit on the number of vials you can use to charge the water.

Best practice is to charge your water for the day all at once. For example: Take a ONE GALLON container and treat it with the number of vials desired for 30-45 seconds for each vial.

**HALO WS vial – WATER STRUCTURE**
Structures water into micro-clusters for greater cellular permeability (uptake and absorption). This is a physical action that takes place at the molecular level. Water structuring does not remove any impurities nor does it change the alkalinity levels of your water.

The HALO charged water can be used for: drinking, cooking, and brewing tea or coffee and any other consumable water use. Also, you may use any type of container or receptacle for your water. Whichever type you choose does not have any affect whatsoever on the molecular structure of charged water. However, cheaper plastic containers may leach toxins into the water so it would be wise to use quality containers.

It is your choice which type of water you use for consumption (Alkaline, spring, filtered, reverse osmosis, distilled, purified, non-purified, etc.) as long as it is clear H2O you will be able to structure it with the HALO WS vial.

Water will remain structured for an indefinite amount of time. We do recommend you charge and consume water as a daily routine for best result. If you decide to store your drinking water do so at your own discretion.
HALO Harmonic Light Devices - Frequently Asked Questions

Q: How do I explain HALO ULTRA BLUE Harmonics Systems?
A: As light photons pass through the vial(s)/tube(s) containing botanical extracts they pick up the harmonic vibrations of the botanicals and transmit the photon and botanical energies into the body where the body responds as if the botanicals were actually present.

All the positive benefits of photon or light therapy combine with the power of active botanicals to produce excellent treatment results.

Q: Why does HALO utilize violet wavelengths?
A: Violet carries more harmonic energy on its wavelengths than other light wavelengths. HALO light devices infuse massive amounts of harmonics into the body and into water during water charging. This accelerates numerous energy reactions and is why HALO is lightning fast and incredibly effective. The diodes used in HALO applications emit 405 nm "violet" light.

Q: How long should each session be performed?
A: That depends on the circumstances and the clinical presentation. Many conditions require only 30 - 45 seconds of light exposure time with individual systems. The longest therapy time would be about 2 minutes. If necessary, repeat a session within 1-2 hours. This allows the body to assimilate and process the harmonic energies introduced. In most cases, 4-6 applications a day are sufficient for the body to receive the benefits of HALO therapy. However, you may certainly perform as many as needed.

Q: How do I charge/structure water?
A: Start with the HALO WS vial and shine the light directly on the open water surface 5-7 seconds for every 16-20 fluid oz. Repeat the same procedure with the vials recommended in your protocol or instructions in turn to charge the water. The HALO charged water can be used for: drinking, cooking, and brewing tea or coffee and any other consumable water use. The Institute of Medicine determined that an adequate intake (AI) for men is roughly about 13 cups (3 liters) of total beverages a day. The AI for women is about 9 cups (2.2 liters) of total beverages a day. However, don’t force yourself; let the Spirit guide you in how much water to drink on a daily basis.

Q: Is it possible to overuse the light device, thereby causing harm to the body?
A: The HALO Systems light devices, with the glass vial in place, will not burn, blister, or in any way injure the skin or cause any harm. Again, never shine the light directly into eyes or off highly reflective materials into the eyes. A treatment, in one bodily area, should only require about 30 - 45 seconds of light exposure. More than that will not harm, but probably will not enhance the overall results. Allow 1 - 2 hours in between sessions for the body to process the harmonic energies introduced.

Q: Will using a light device on a pregnant woman harm the fetus?
A: Understand that all of these answers relate only to our light device systems and not any competitors’ models. There should never be a reason to employ a light device directly over a pregnant woman’s frontal midsection. We advise against this. Performing a treatment anywhere removed from direct frontal midsection will cause no injury whatsoever. For example, if the woman is suffering from low to mid-back pain, treat the area as usual. The light will diffuse within the muscular and joint tissues before reaching the fetus. Also, amniotic fluid acts as a light diffuser but always remember to use common sense. Also remember that our guiding directive is “Do No Harm”. Any other bodily areas away from frontal mid-section, or directly over the eyes, are safe for our photo-botanical treatment systems.

Q: What is the depth of penetration of a standard light-generating device?
A: The accepted depth of penetration capacity of the light emitted from modern light generating devices depends on its specific wavelength and light intensity, but, on average, the penetration is about 3 – 6 cm (1 – 2 inches.). The majority of photons are absorbed in the first few millimeters. As the photons pass through the skin, the more superficial tissues absorb them, thus reducing the number of photons that reach deeper layers. However, as photons enter the body, they create a powerful physiological effect by inducing local metabolic changes and the creation of secondary messengers. Secondary messengers are molecules that relay signals received at receptors on the cell surface that target molecules on the cell membrane and within the nucleus of the cell to modify physiological and genetic information.
Secondary messengers also serve to greatly amplify the strength of the photonic-botanical signals causing important beneficial changes in the biochemical activities within the cell. Thus, as the effect of the photons diminishes with increasing depth, the physiological effects rapidly multiply, creating the possibility of a profound local and systemic effect. This is how photonic-botanical energies quickly create systemic effects.

It was Dr. Endre Mester’s experiments in 1966–67 that first documented the widespread, systemic effect of light therapy. Serving as a professor of surgery in Hungary, Dr. Mester performed a series of revolutionary experiments that first documented the healing effects of high-energy light devices. In his earliest study, he discovered that tissue growth was accelerated with light (photon) therapy. His later experiments documented not only improved healing with photon therapy, but also demonstrated that the healing was a systemic and not a local phenomenon. His work stimulated many other researchers in Europe and Eastern Europe to appreciate the value of light therapy long before it was appreciated in Asia, Africa and the Americas.

HALO Light Therapy does not rely on light alone as do all other light therapies. HALO Light Therapy transmits light through vials of botanical and amino acid blends. The light photons then carry the vibrational energies of these components into the body where the body then uses the energies in a myriad of ways to promote a number of positive reactions.

Q: Does the HALO Systems harmonics botanical light treat, heal or cure?
A: Without getting into legalities or semantics, the light device carries photonic energy and the vibrational harmonic energies of the botanical solutions into the body. The cells react to both the photon energy and the vibrational harmonics of the botanicals; the cells themselves bring about any healing effect(s). The cells receive photon and botanical energy from our unique & patented process & utilize this energy in the healing processes. As expressed previously, there are many factors that influence the body’s healing responses including age, diet, exercise, general health, lifestyle factors, stress, etc. It would be accurate to state that the light/photons and botanicals do not heal, cure, etc., rather the body itself is the miracle. The body utilizes the supplied energies from this and other sources to aid in its healing processes.

Q: Is it OK to carry the light devices onboard an aircraft?
A: If you desire to carry a system with you, we would advise purchasing a HALO ULTRA BLUE System for its portability. Regarding the HALO ULTRA BLUE System, it is legal and acceptable to carry aboard an aircraft but when going through the security check make sure to place your device(s) in the plastic tub with your laptop, loose change, personal items, etc. The TSA will pull you aside for additional screening about 50% of the time. The TSA agent will usually ask, “What are these?” Your best response would be, “This is a therapy device”. Then they will swipe down the light device(s) and the case in which you keep them to check for explosive residue. Then you’re on your way. DO NOT DEMO OR BEAM THE LIGHT DEVICE INSIDE THE AIRCRAFT, OR USE IT IN ANY WAY WHILE WITHIN THE AIRCRAFT. Again, use common sense when using light devices and know when not to use them.

Q: How do I explain the HALO photonic/botanical light therapy? What are the three main benefits they might expect to receive?
A: The HALO Systems act like massive harmonic engines to infuse the body with the light/botanical harmonic energies. The majority of patients/clients’ experience:

1. Pain reduction or elimination within seconds in most cases.
2. A feeling of relief, stress reduction and a calming sensation immediately post session lasting from 6 to 12 hours and often longer.
3. A feeling of renewed vigor and vitality that can last for days.

The amazing thing about the HALO Systems is the increase in overall perceived “wellness” and added vitality, not just the reduction or elimination of pain.

A2: The photonic/botanical harmonic energies stimulate ATP production within the cells and increase intercellular communication. The body has unique mechanisms that know what to do with these energies and how best to incorporate these energies to expedite energy distribution and healing throughout the body.

Q: How long do the vials last or how many sessions are the botanicals good for?
A: Vials that were created 15 years ago are just as viable today as the day they were originally made. One might assume that the botanical vials will last beyond 10 years.

Q: The majority of patients experience instantly noticeable results. However, a few of my patients don’t experience those instant results. Why is this?
A: Employ harmonically energized water immediately to your patient/client protocols and within 24 hours you will
observe a profound difference. Charged water protocols are a major part of HALO therapy. Charged water provides the proper media to conduct the HALO harmonic energies from cell to cell via electro-magnetic transduction.

Q: What ingredients are in each of the vials or what are the formulas that are in each of the vials?
A: The botanical formulas are highly proprietary and have been developed over several years. Reading the ingredients listed in this User Manual would provide one with an idea of what is used in the various vials.

Q: I used the HALO System on a person suffering with either neuropathy, MS, ALS, Alzheimer’s or Parkinson’s. They experienced a burning or itching sensation where the light struck the body and sometimes in other bodily areas. What caused this to happen?
A: Phototherapy has been proven to improve intercellular communication and the System vials were formulated to help the neurons begin to regenerate by providing the energies to start the healing processes. It appears that as this improved communication and healing starts to take place that a feeling of heat is generated through the nerve channels. This would appear to be a very positive indicator that the healing process has begun.

Q: Is there a danger of burning the skin when using the HALO Systems Violet light device?
A: The HALO Systems light device is extremely powerful and should never come into direct contact with any skin surface or shined directly into open eyes. Keep the unit at least one inch from the body part and move back and forth over the area of interest to avoid any undesired heating of skin area.

Q: Should I or my patients/clients wear eye protection when using the lights?
A: As mentioned earlier in the User Manual, both the operator and the patient/client should wear polarized sunglasses while operating the light to avoid the possibility of temporary flash blindness from either direct or reflected white light off the patient/client skin or any other reflective surface. Do not shine the light directly in the eyes of a patient/client as it is too bright and could cause temporary flash blindness or discomfort. Do not stare directly into the Violet light and have the patient/client close their eyelids when shining the Violet light on their eyelids or close to their eyes. Use common sense when operating the HALO Light Systems device. Re-read the warnings and cautionary statements in the beginning of the User Manual for more on this.

**Acacia Senegal Gum Arabic** - Acacia is the gum that is exuded from the acacia tree. It's a dietary fiber that can dissolve in water. As a medicine, acacia is taken by mouth to reduce cholesterol levels and to help increase weight loss.

Organic Acai - Researchers have found the acai berry has antioxidants that may protect cells from damage caused by harmful molecules in the body called "free radicals," and may possibly help against diseases such as heart disease and cancer.

**Galangal** - The medical applications of galangal are in many ways the same as its close relative ginger. It is a bitter herb that is used to promote digestion and stimulate appetite and production of digestive fluids. The herb is therefore used to treat anorexia, indigestion (dyspepsia), colic and stomach ache.

**Black Seed Oil** - Of the many ways that black seed oil benefits the body, the six that stick out in the scientific literature tout its ability to help prevent cancer, diabetes, obesity, hair loss, skin disorders and infections like MRSA.

**Mint** is a calming and soothing herb that has been used for thousands of years to aid with upset stomach or indigestion. Mint is thought to increase bile secretion and encourage bile flow, which helps to speed and ease digestion (and which may also support healthy cholesterol levels).

**Mistletoe** - There are an incredible amount of health benefits of mistletoe, including its ability to treat cancer in a number of ways, prevent diabetes, soothe respiratory distress, calm the nervous system, lower blood pressure, promote good sleep, eliminate inflammation, increase immune system activity, reduce snoring, and decrease menstrual pain.

**Graviola** - also known as custard apple, guanabana and Brazilian paw paw. Practitioners of herbal medicine use soursop fruit and graviola tree leaves to treat stomach ailments, fever, parasitic infections, hypertension and rheumatism. It's used as a sedative, as well.

**Maca Root** - Not surprisingly, maca root has a centuries-long reputation for being a powerful aphrodisiac. Loaded with minerals like zinc, iodine, and essential fatty acids, maca may balance sex hormones and may also improve mood. With a healthy mood and balanced hormone levels, arousal is usually much easier to achieve.

**Avena Sativa** means “wild oats” in Latin. This plant, also referred to as oat straw or oat extract, was used as a medicine prior to being used as food. This plant may have sparked the phrase, “sowing your wild oats,” due to its effect on sexual stimulation. Potential benefits are not limited to its impact on the libido, however. Wild oats are rich in B vitamins, phosphorous and calcium.

**Catuaba** is an herb. People use the bark to make medicine. Catuaba is used to heighten sexual arousal and treat male sexual performance problems. The name catuaba (pronounced [ka.two.'aba], a Guarani word that means "what gives strength to the Indian") is used for the infusions of the bark of a number of trees native to Brazil. The most widely used barks are derived from the trees Trichilia catigua and Erythroxylum vaccinifolium.
Suma Root - Sometimes called Brazilian Ginseng, this herb is extremely popular with the native population in South America for the way it aids female hormonal balance and excites libido. Science has confirmed *suma root* increases levels of estradiol-17beta, the primary estrogen hormone during a woman’s reproductive years. Women who use this herb report more intense sexual experiences and greater satisfaction.

**Valeriana officinalis** - The root of this tall perennial flowering plant is dried and used as a calming agent and sleep aid. According to numerous studies, valerian, native to Europe and Asia, may help reduce the amount of time it takes a person to fall asleep and also help increase the duration and quality of sleep.

**Magnolia Bark (Magnolia officinalis)** - used extensively in Chinese medicine, is known to reduce cortisol levels and promote relaxation of both the body and the mind. Not only can this have a positive impact on improving duration and quality of sleep but it can also help reduce the risk of obesity and type II diabetes.

---

**Lavender** is a woody shrub with a very pleasant aroma and lovely purple flowers. Lavender promotes relaxation which can help with anxiety, depression, stress and insomnia.

**Chamomile**, like valerian, is a traditional herbal remedy that has been used since ancient times to fight insomnia and a wide range of other health complaints.
