

WATER STRUCTURE (Charging)

Step 1:

Start with the **WS HALO** vial and shine the light directly on the open water surface 6 seconds for every 16 fluid oz.

Step 2:

Repeat the same procedure with the **LONGEVITY** vials (L vials) in turn to charge the water with these vial harmonics.

Optional Step 3:

For immune system, energy and overall vitality booster, introduce the following vials as needed: **A-V, AL, SS, IM and EN vials**

WS Halo HO vial -- WATER STRUCTURE

Structures water into micro-clusters for greater cell permeability (uptake and absorption).

The **HALO** charged water can be used for: drinking, cooking, brewing tea or coffee and any other consumable water use. The Institute of Medicine determined that an adequate intake (AI) for men is roughly about 13 cups (3 liters) of total beverages a day. The AI for women is about 9 cups (2.2 liters) of total beverages a day. However, don't force yourself, let the Spirit guide you in how much water to drink on a daily basis.

Best practice is to charge your water for the day all at once. Take a **one gallon** container and treat it with the vials desired for **45 seconds for each.**
