Structured Water (HALO charged water)

Did you know that you can use the HALO System to create HALO Structured Water? HALO Structured Water is a powerful H2O molecular structure that you can drink on a daily basis to reap the benefits of our botanical and herbal extract systems.

The photons (light) pass through the vials that contain botanical extracts and pick up the harmonic vibratory signature of the botanicals. It acts as a delivery system for the botanical resonance, which is then carried to the water, restructuring the molecules into micro-clusters. This is a physical action that takes place at the molecular level. All you have to do is drink to your health!

- HALO Structured Water helps with detoxification.
- Proper hydration facilitates better oxygenation to the body at the cellular level.
- Helps with flushing out toxins from the body and increase cellular communication.
- HALO Structured Water effective delivery of nutrients.
- Consider your total HALO water intake as part of your daily therapy.
- HALO Structured Water helps with mental clarity.

HALO structured water can be used for any consumable water use. It is your choice what type of water you use for personal consumption: Alkaline, tap, spring, filtered, reverse osmosis, purified, etc.). As long as it is clear H2O, you will be able to structure it with the WS vial. The container you use does not have any effect on the molecular format of the micro clusters once your water is structured. Water will remain structured for an indefinite amount of time.

VITAMINS & MINERALS
V Series 1 – 4 (Vitamins and Minerals) – The V Series System vials and tubes contain the most comprehensive assortment of vitamins and minerals designed to provide the harmonics of health and wellness utilizing the advanced process of quantum harmonic energies available to the body at the speed of light!

The V Series provides all necessary vitamins: A, B complexes, C D, E & K as well as every necessary mineral such as calcium, potassium, phosphorus, magnesium, iron, sodium, sulphur, chloride, zinc, chromium, manganese, copper, selenium, cobalt, molybdenum, iodine, boron, silicon, vanadium, nickel and arsenate.

One of the main problems with oral vitamin and mineral supplements is the lack of bioavailability via ingestion and nutrient degradation, lack of uptake due to leaky gut and a host of other potential negative factors. Due to the heat loss resulting from chemical interactions in the body, 98-99% of vitamins and minerals are bio-unavailable. Quantum harmonics provided by the HALO System provide 100% of harmonic transference to the body.

Another major problem is that vitamins and minerals are quite expensive and you must repurchase them usually monthly. Resulting in hundreds, if not, thousands of dollars spent every year. The HALO System V Series has been designed to provide vitamin and mineral harmonics for many years, saving you lots of money.
HALO Liquid-filled Vial Systems contain various proprietary botanical combination formulas that serve as the key to facilitating the body’s healing responses. The power of HALO Systems is in the botanical solutions which are in the vials/tubes.

To best protect these vials and tubes, HALO Systems employs the highest quality of Borosilicate Glass from a top manufacturer in the USA. These glass vials and tubes are thermal-shock resistant and designed to last for many years. It is for these reasons you can be assured that every HALO System vials and tubes are of premium quality and why we offer a one-year warranty on your premium investment (please see Warranty Certificate located at the end of this manual).

We encourage you to observe and follow these cautions and best practices:

▪ 1st approach is to use common sense and best judgement when using HALO Systems.
▪ Don’t drop your vials on tile or hard flooring. The vials and tubes will break if dropped from 3 feet or higher.
▪ Identify a stationary location for therapy treatments.
▪ Do not open or loosen cap. The vials/tube caps are not sealed and can loosen up during handling. Best practice is to inspect your vials frequently and tighten any loose caps.
▪ Clean your vials/tubes frequently. Just like your eyeglasses, the vials/tubes can collect dust, moisture, fingerprints and oils. Use any clean cloth to wipe down.
▪ Keep your HALO Systems kit in room temperature environment. Should your HALO System in any way be exposed to cold weather be sure to allow the light unit to return to normal room temperature (above 68 degrees Fahrenheit to a maximum of 80 degrees Fahrenheit) before operating.

▪ During cold weather, some of the vials may show signs of crystallization (Freezing like condition). In that case, allow them to return to normal room temperature before using in the light unit. If they appear frozen or cloudy after a few hours, take a blow dryer set to high heat and waft the dryer back and forth across the glass vial until you reach complete clarity. DO NOT use in light device until solution is fluid, clear and back to room temperature.

▪ As light passes through the botanical solutions, harmonic vibration generate friction within the molecules, thus the vials heat up according to the molecular composition of the botanicals. Therefore, some vials will release more heat than others. This is normal and expected. If you experience heated vials, simply allow them to cool down before re-application.
▪ Over a period of time, some solutions have photo-reacted and burned the solutions causing discoloration. HALO Systems advanced chemistry formulas have been engineered to maximize their efficacy for many years. However, with regular use and applications, the organic properties of these botanicals may gradually show signs of photo-reaction.
