

Structured Water

Did you know that you can use the HALO System to create HALO Structured Water? HALO Structured Water is a powerful H₂O solution that you can drink on a daily basis to reap the benefits of our botanical and herbal extract systems.

The photons (light) pass through the vials that contain botanical extracts and pick up the harmonic vibratory signature of the botanicals. It acts as a delivery system for the botanical resonance, which is then carried to the water, restructuring the molecules into micro-clusters. This is a physical action that takes place at the molecular level.

Water Charging Instructions

HALO structured water can be used for any consumable water use. It is your choice what type of water you use for personal consumption: Alkaline, tap, spring, filtered, reverse osmosis, purified, etc.). As long as it is clear H₂O, you will be able to structure it with the WS vial.

The container you use does not have any effect on the molecular format of the micro clusters once your water is structured. Water will remain structured for an indefinite amount of time.

STEP 1

Start with the WS vial and direct the light upon the open surface of the water for 15 seconds for every 1-5 gallons of water.

STEP 2

After first using the WS vial to structure your water, you can now infuse your water with any number of botanical vials for 15 seconds each.
